

KOTTALA SAMUEL

Full Stack Developer | AI Systems Engineer

Hyderabad, India | +91-9652308330 | [Email](#) | [LinkedIn](#) | [GIT](#) | [Portfolio](#)

PROFILE SUMMARY

Full Stack Developer with 3 years of experience building and deploying production-grade web applications and enterprise tools across accounting SaaS, AI-powered warehouse management system, role-based admin management systems, Job portals, e-commerce and matrimony platforms. **Core stack: Angular, React, Node.js, TypeScript, PostgreSQL, MySQL, REST APIs, Redis, and JWT-RBAC** — delivered across the full software lifecycle from UI design and backend API development to database schema, cloud deployment, and production support. Brings additional depth in data analytics, BI reporting, and LLM integration, enabling intelligent and data-driven features within the applications built.

TECHNICAL SKILLS

Frontend: Angular 16+, React, TypeScript, JavaScript, PrimeNG, Material UI, Tailwind CSS, SCSS, RxJS, HTML5

Backend & APIs: Node.js, Express.js, Spring Boot (Java), Flask, RESTful APIs, Swagger, JWT Auth

Databases: PostgreSQL 16, MySQL, MongoDB, IBM DB2, Supabase, Cloud SQL, Redis

Data & Analytics: Python (Pandas, NumPy, NLTK), SQL Aggregations, Power BI, Tableau, Excel, Recharts

AI & ML: LLM Integration (Sarvam AI, Ollama, Groq), Prompt Engineering, DistilBERT, Sentence Transformers

Cloud & DevOps: Azure, GCP, IBM Cloud, Render, Netlify, Hugging Face Spaces, Git, CRON, cPanel

Practices: Agile/Scrum, RBAC, Modular Architecture, CI/CD, ETL Pipelines, Redis Caching

PROFESSIONAL EXPERIENCE

Full Stack Developer [React, Angular | Node.js | AI] — *ALX Solutions | Remote | Nov 2024 – Present*

- Architected and delivered ALX Books, a GST-compliant accounting SaaS — built React frontend with dashboards, invoice flows, GSTR/ITR compliance screens, and audit logs backed by SQL views; reduced client reporting time from 4+ hours to under 20 minutes.
- Delivered full-stack MERN application for engineering institutions — designed normalized MySQL schema, built 20+ REST APIs with JWT-RBAC, engineered ETL pipeline for 5,000+ student records; cut admissions processing time by 60%.
- Architected AI-powered Warehouse Management System (ingodam.com) on PostgreSQL 16 — tracking transactions with gate pass automation, bond expiry alerts, and Redis-cached analytics; built PromptContextService grounding LLM assistant in live operational data, eliminating AI hallucinations.

Application Developer [Angular | Frontend] — *JOJO Techland | Hyderabad | Nov 2023 – Nov 2024*

- Shipped 3 SaaS platforms (Job Portal, Matrimonial, E-commerce) using Angular 16+ and PrimeNG; built 5 role-based modules serving 500+ daily active users across web and mobile.
- Integrated REST APIs (Swagger) with Node.js backend; achieved web/Ionic mobile feature parity in under 3 sprint cycles and accelerated feature delivery by 2 weeks.
- Refactored codebase into modular services and reusable components, reducing code duplication by ~30% and improving long-term maintainability.

Data Analyst Intern [SQL, Power BI, Tableau] — *Smart Bridge | Hyderabad | Feb 2023 – Jul 2023*

- Analyzed 10,000+ records using SQL; built 4 dashboards (Tableau, Power BI, Google Sheets) surfacing KPIs and anomaly flags for 3 stakeholder groups.
- Developed IBM Watson chatbot with Flask + DB2 on IBM Cloud, automating 200+ weekly FAQ queries and reducing support response time by 35%.

PROJECTS

AI-Driven IT Service Desk Analytics | *Python, DistilBERT, TF-IDF, Sentence Transformers, Gradio | Live Demo*

- Preprocessed 47,837 IT tickets; benchmarked 5 models — DistilBERT achieved 91% F1 vs. SVM 85%; built MiniLM semantic search returning top-3 similar resolved tickets, cutting agent resolution time by 25%. Deployed on Hugging Face Spaces.

AI-Based Library Management & Analytics Platform | *MySQL, Node.js, React, Recharts*

- Built production library platform with AI book recommendation and summarization; delivered secure REST APIs (JWT/RBAC), Recharts BI dashboards tracking 15,000+ transactions, and ACID-safe issue/return workflows — reducing manual librarian reporting by 70%.

NMP — B2B/B2C E-Commerce Store and IMS | *Angular 21, TypeScript, RxJS, Tailwind CSS | Live Demo*

- Built high-performance Angular e-commerce using Signals, @defer, NgOptimizedImage — achieving 90+ Lighthouse score; SOLID modular architecture with automated Netlify CI/CD.

EDUCATION

Bachelor of Engineering (Information Technology) — *MVSR Engineering College, Osmania University | 2019 – 2023 | GPA: 7.1/10*
